**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 9-14, 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Burroughs et al (US 6221046). Burroughs discloses a drive mechanism 20 comprising a housing 24, 26 having internal and external threads, a piston rod 210, a dose dial sleeve 34, a drive sleeve 38, and a clutch means (Col. 2, lines 51-55). The device is a pen type injector device comprising a needle 222. The device can be used to deliver insulin (Col. 1, lines 19-25).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7, 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Burroughs in view of Slate et al (US 2002/0167499). Claims 7 and 15 differ from Burroughs in calling for the

device to be a needle free device. Slate teaches a injection device with a drive mechanism similar to that of Burroughs that is a needle free jet injector that allows the device to be used a large number of times with a large number of patients without the risk of spreading disease (Page 1, paragraph 0003). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the device of Burroughs to be a needle free device as taught by Slate to allow the device to be used a large number of times with a large number of patients without the risk of spreading disease.
